Cloud Consulting Services

Cloud Computing Consulting Services

RAIZEON TECHNOLOGIES PRIVATE LIMITED helps organizations transform their IT environment with cost-effective Cloud services. Our team of experts delivers cutting-edge Cloud computing consulting services that help companies boost their productivity to new heights.

Our Cloud managed services make it possible for organizations to reduce their overheads and better productivity, in addition to lowering costs and reducing time-to-market.

We assist customers with our on-demand enterprise Cloud solutions, tools, and applications such as servers, storage, databases, networking, software, and apps, among others.

With our expertise in Cloud managed services, we help our clients become more agile and responsive to the changing market landscape. We help our clients make the right decisions, optimizing their Return on Investment (ROI).

Container Orchestration Services

Deliver Applications At New Speed

In today's software environment, where majority tasks are running on the cloud and in a DevOps culture, application delivery needs a special attention to keep the business running.

In the process of streamlining infrastructure, Cloud and Virtualization are a means of enhancing server efficiencies and maximizing server resources.

Further, in line with the application-centric business transformation, running apps at a faster rate, smoothly and secured, has emerged to become a key point of focus. Eventually, firms began their migration journey to better perform with higher efficiency and competitive operating costs.

That's where the containerization technology made the difference! Some call it 'a replacement to virtualization' while others say it's 'an advancement to the concept of 'Virtual Machines (VM)'.

Containerization arrived as a sophisticated approach for the effective utilization of server efficiencies with minimum additional resources.

DevOps Consulting Services

Application Delivery and Operational Efficiency at High Velocity

Fast-paced development and better time-to-market are the two key factors determining a company's success in the current IT field.

Furthermore, organizations that have not yet adopted DevOps consulting services are currently facing the following challenges:

- Lack of cultural balance and communication between software Development and IT Operations Teams
- Lack of agile delivery to drive software-driven innovation in DevOps services company
- The continued existence of silos between Development, IT, and Operations teams
- Non-involvement of DBAs in release cycles has a substantial impact on the inner circles
- Lack of acceptance on a holistic view of the complete value-chain for continuous delivery tools

DevOps can address these issues! DevOps as a Service recommends a new 'culture' that ideally bridges gaps between the primary operational teams i.e., Development (Dev) and Operations (Ops), for better collaboration and enhanced productivity

RAIZEON TECHNOLOGIES PRIVATE LIMITED DevOps Services

RAIZEON TECHNOLOGIES PRIVATE LIMITED, with over a decade of demonstrated competence in IT, has a team of experts who can provide you with a successful DevOps implementation strategy.

We offer DevOps consulting services to our customers with services encompassing several capabilities, including iterative and incremental development, on-demand workload management, lightweight architecture, security, and automated testing techniques.

Digital Transformation Solutions

Empower Business with Digital Experience

Every firm has adopted IT transformation services due to changing end-user preferences and rising demand for product experience.

As a result, the business environment has begun to shift toward digitalization, regardless of geography, industry, regulatory barriers, or other factors.

Why Digital Transformation?

Industry has gone through a plethora of choices of transitions, from resource-centric to budget-centric to finally customer-centric.

What drives this trend?

The solution is the critical necessity for a 'Digital Capabilities driven End-user Experience,' in order to ensure success in the digital transformation services and:

- With the increasing demand for remote work access and continual access to technology, workforce engagement takes importance.
- Data security and compliance, as well as protecting data from cyberthreats and breaches.
- Growing reliance on external agencies, distributors, and suppliers necessitates the creation of a cohesive network.
- Digital Transformation
- Assess Your Digital Transformation Readiness with RAIZEON TECHNOLOGIES PRIVATE LIMITED
- Strategic Assessment is key to the success of any process. RAIZEON TECHNOLOGIES PRIVATE LIMITED Digital Transformation Managed Services involves the program of market dynamics and technological possibilities for achieving desired results in digital transformation companies.

Through our subject expertise and considerable experience, we've helped organizations ranging from small-to-medium enterprise's to large-scale enterprises adapt their digital transformation strategy by understanding their sector and tailor-made solutions.

RAIZEON TECHNOLOGIES PRIVATE LIMITED Solutions has offered its services primarily in the Automotive, Aviation, BFSI, Energy, Entertainment, Government, Healthcare, IT, Retail, Telecommunications, and other industries.

Our assessment combines:

- Analyze issues to be addressed and the opportunities that have yet to be explored in order to reach maximum potential.
- Conducting a gap analysis to identify inefficiencies and redundancies
- Assessing how your business responds to emerging applications and modern changes in the current technology advancements
- Understanding budget and financial resources will help you establish your digital transformation strategy, decide on priorities, determine your goals, and define the scope of your project.
- Create a digital transformation consulting provider roadmap to make sure that business development follows the evolving digital landscape.
- RAIZEON TECHNOLOGIES PRIVATE LIMITED Digital Transformation solutions is the analysis and comprehension of the requirement for changing corporate attitude and culture.

RAIZEON TECHNOLOGIES PRIVATE LIMITED support the selection of technological solutions designed to realize long-term visions and believe in starting with small, deliberate steps toward a broader ambition.

Identity and Access Management Services

Secure Digital Assets With Identity Management

In the fast-emerging cyberspace, IT security continues to be the top challenge for organizations globally.

It has become a race against time to detect and resolve problems before they cause any harm to IT infrastructures.

Common challenges that are a matter of concern to the security teams include:

- Increased volume of sophisticated cyber attacks
-

- Enhanced business complexity of security environment
- Overwhelming volume of threats
- Hefty regulations and fines
- Skill gaps in organizations struggling to fill cyber security roles
- The growing digital adoption has indeed made Identity Management a Herculean task, paving the way to potential cybersecurity risks.

This is where the Identity and Access Management (IAM) services stand crucial!

Why IAM as a Service?

As a critical part of the IT security discipline, identity management services refer to the framework, offerings, and solutions that help manage digital identities and access crucial resources.

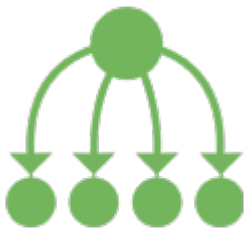

IAM security services and solutions also perform provisioning and de-provisioning, authentication, and authorization of digital entities and resource access control. The core idea of IAM is to ensure the proper access to the right individual in the right context.

An Overview of Identity and Access Management Core Activities

An organization's security policies led by IAM services, and solutions typically:

- Identify users and assign perfect roles
- Ensure systems, information and processes governed by IAM principles
- Safeguard sensitive data, systems, and information
- Add, remove and manage users and access rights
- Undertake provisioning and de-provisioning of resources and entities
- Our Approach

RAIZEON TECHNOLOGIES PRIVATE LIMITED's approach to Identity and Access Management security services is built on core activities, namely, Access Management, Identity Management, Access Governance, and PAM, among others.

Managed IT Services

Business Continuity with Managed IT Needs

IT industry is growing at high speeds, with new technology solutions and processes marking their foray now and then.

In this openly-competitive environment, gaining a competitive edge has become critical, and keeping the business running is the need of the hour.

As the focus is more on innovation and speed of delivery, it is quite logical that everything can't be self-made or self-

managed

This is where the concept of Managed IT Services emerged as third-party support to IT firms striving to keep their business running uninterrupted.

Defining Managed IT Services

Managed Services Offerings or Managed IT Services refers to the IT support services offered by a third-party, i.e., IT Managed Service Provider (MSP), who addresses some or all sorts of IT requirements. Managed IT services can happen on-demand, short term or on a contractual basis for a long-term duration.

In other words, this can also be explained as outsourcing a range of IT needs, including infrastructure, applications, security, and maintenance, to managed IT service providers.

Technology Advisory Services

Engage success with right technology decision-making

As a result, every IT advisory services in today's fast-evolving world seeks to lend a competitive edge to their clients. They tend to focus particularly on the deployment of technology advisory services and keeping up with trends.

Most business advisory services center their focus on innovation and company strategy instead of the significant aforementioned issues which hampers business productivity. That's where the Technology Advisory Services (TAS) can help you.

Technology Advisory Services is a client-driven strategy that offers a range of IT consultation services, including expert guidance supported by top-tier knowledge and in sync with the ebb and flow of technological developments.

A Strategic Technology Advisory helps you:

- Create an effective IT Strategy
 - Adjust operations to meet corporate objectives
 - Invest in the appropriate technology and implement it
 - Adopt the shifting IT landscape
 - Keep up with the latest technology developments
 - Enhance enterprise architecture
 - Manage and improve IT expenses
 - Reduce IT risks and bolster command
 - Analyze the planning and administration of IT
 - Increase efficiency and logistics

Innovative Digital Continuity Solutions

Customized for Your Needs

Network Closet

Customized network closets with RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions

RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions tailors data centers with factory-integrated, customized network closets. We can design and deploy network closet infrastructure in timeframes as short as a few weeks, creating better ecosystem control and optimizing performance. Our solutions are built to maximize flexibility, scalability, and efficiency by integrating your specific requirements into our simplified, standardized designs.

Micro Data Center

RAIZEON TECHNOLOGIES PRIVATE LIMITED micro data centers tailored for your needs

RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions' micro data centers align power, cooling, monitoring, and racks with business needs and constraints. Our solutions team works with you from developing the initial requirements all the way through project execution, allowing you to focus on your core business. Our micro data center solutions give you a new way to deploy data center capacity in any space or place.

Edge Data Center

Customize your edge computing with RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions

RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions unlocks new possibilities at the edge by designing and delivering scalable, customized data centers that speed deployment, minimize risk, and control costs. Implement from dozens to hundreds of customized modular edge data centers that are built to maximize flexibility, improve scale, and boost efficiency.

Core Data Center

Build flexible, scalable and efficient core data centers with RAIZEON TECHNOLOGIES PRIVATE LIMITED

RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions makes expanding core data centers and critical facility capacity easy. RAIZEON TECHNOLOGIES PRIVATE LIMITED uses modular integration techniques to help our customers, contractor, and consulting partners more effectively design and build data centers anywhere in the world. We offer flexible, scalable, and efficient solutions that are pre-engineered, pre-fabricated, and pre-tested, before being rapidly deployed and assembled on-site. By engaging with IT, facilities, network, and security, our solutions team works with you through the whole process, from developing the initial requirements all the way to project execution.

Colocation and Cloud

Customized colocation solutions with RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions

RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions help colocation companies maximize efficiency, deliver flexibility, and ensure just-in-time scalability with customized pre-fabricated, pre-tested and pre-integrated data centers. We provide unique designs, building and executing a scalable facility that enables adding cooling, power, and whitespace on the fly as needed.

Cable Landing Station

Leverage Vertiv global solutions for customized cable landing stations

RAIZEON TECHNOLOGIES PRIVATE LIMITED global solutions has an unmatched modular data center manufacturing footprint worldwide, with successful cable landing station installation on six continents. We deliver customized, pre-tested and factory integrated cable landing station solutions that offer the ideal combination of value and delivery time. With rapid deployments of data center components, our installations can be assembled with fewer people on site, anywhere in the world.

Government Advisory

Consulting Services

At RAIZEON TECHNOLOGIES PRIVATE LIMITED in India, our team of advisory experts assist and guide organisations on:

- e-Governance Consultancy (BPR, DPR, RFP, Bid Process, Transaction Advisory)
-

- Digital / IT Strategy & Transformation
- Program & Project Management
- Smart City Solutions Consulting
- Process Design, Automation and Transformation
- Impact Assessment, Feasibility Study, Public Private Partnership
- Policy Advisory & SOP Preparation Services – CSR Policy, Procurement Policy

Data Analytics & Emerging Technologies

Data plays a critical role data in shaping the future and getting insights on actions. At BDO in India, our data analytics solutions are omni-platform, and our data experts possess capabilities to deliver solutions both on open source as well as license-based products.

- Data Management & Governance
- Big Data Analytics
- Predictive Analytics
- Artificial Intelligence and Machine Learning (AI & ML)
- Blockchain
- IoT and RFID Solutions
- Web Intelligence
- Robotic Process Automation (RPA)
- Natural Language Processing (NLP)
- Chatbots

Public Sector Cyber Security Services

At RAIZEON TECHNOLOGIES PRIVATE LIMITED in India, our team of cyber security experts help clients to deal with cyber security problems and solutions and offer enabling services to help them build resilience and meet the needs of the evolving landscape safely and securely.

- Cybersecurity Strategy Policy and Program Design
 - Information Governance and Data Privacy
 - System Audit and Review
 - Managed Information Security Services
 - ISO 27001, PCI DSS, ISMS Preparedness and Certification
 - SOC Design and Implementation
 - Security Solution Implementation
 - Third Party Audits (Data Centre, Network, Applications)
-

Software Development and System Integration

With a team of experienced in-house tech-experts, we are able to provide well rounded guidance and assistance on:

- System Integration
- Solution Designing & Implementation & Operations
- Technology Transformation
- ERP Implementation & Support
- Smart Cities
- Bespoke Development
- University Management System
- Portal Development
- Management Information Systems
- Hospital Management Information System
